

# Welcome to the AccessibilityOnline Webinar Series

A collaborative program between the ADA National Network and the U.S. Access Board

The Session is Scheduled to begin at 2:30pm Eastern Time  
We will be testing sound quality periodically

Audio and Visual are provided through the on-line webinar system. This session is closed captioned. Individuals may also listen via telephone by dialing 1-712-432-6297 code 510110# (This is not a Toll Free number)

The content and materials of this training are property of the US Access Board and the Great Lakes ADA Center and cannot be used and/or distributed without permission. This program is funded through a contract agreement with the U.S. Access Board. For permission to use training content or obtain copies of materials used as part of this program please contact us by email at [ada@gladgretakes.org](mailto:ada@gladgretakes.org) or toll free (877) 232-3399 (V/F/T/T)

[www.AccessibilityOnline.org](http://www.AccessibilityOnline.org)

---

---

---

---

---

---

---

---

---

---

## Listening to the Webinar

- The audio for today's webinar is being broadcast through your computer. Please make sure your speakers are turned on or your headphones are plugged in.
- You can control the audio broadcast via the Audio & Video panel. You can adjust the sound by "sliding" the sound bar left or right.
- If you are having sound quality problems check your audio controls by going through the Audio Wizard which is accessed by selecting the microphone icon on the Audio & Video panel

---

---

---

---

---

---

---

---

---

---

## Listening to the Webinar, *continued*

If you do not have sound capabilities on your computer or prefer to listen by phone, dial:

**1-712-432-6297**

Pass Code:  
510110#

This is **not** a Toll Free number

---

---

---

---

---

---

---

---

---

---

## Listening to the Webinar, *continued*

MOBILE Users (iPhone, iPad, or Android device and Kindle Fire HD)

Individuals may listen\*\* to the session using the Blackboard Collaborate Mobile App (Available Free from the Apple Store, Google Play or Amazon )

\*\*Closed Captioning is not visible via the Mobile App and limited accessibility for screen reader/Voiceover users

4

---

---

---

---

---

---

---

---

## Captioning

- Real-time captioning is provided during this webinar.
- The caption screen can be accessed by choosing the  icon in the Audio & Video panel.
- Once selected you will have the option to resize the captioning window, change the font size and save the transcript.

5

---

---

---

---

---

---

---

---

## Submitting Questions

- You may type and submit questions in the Chat Area Text Box or press Control-Mand enter text in the Chat Area
- If you are connected via a mobile device you submit questions in the chat area within App
- If you are listening by phone and not logged in to the webinar, you may ask questions by emailing them to [webinars@accessibilityonline.org](mailto:webinars@accessibilityonline.org)

Please note: This webinar is being recorded and can be accessed on the AccessibilityOnline website at [www.accessibilityonline.org/Archives](http://www.accessibilityonline.org/Archives) within 24 hours after the conclusion of the session.

6

---

---

---

---

---

---

---

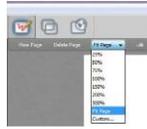

---

## Customize Your View

- Resize the Whiteboard where the Presentation slides are shown to make it smaller or larger by choosing from the drop down menu located above and to the left of the whiteboard. The default is "fit page"

7

---

---

---

---

---

---

---

---

## Customize Your View, *continued*

- Resize/Reposition the Chat, Participant and Audio & Video panels by "detaching" and using your mouse to reposition or "stretch/shrink". Each panel may be detached using the  icon in the upper right corner of each panel.

8

---

---

---

---

---

---

---

---

## Setting Preferences

- Depending on your system settings you may receive visual and audible notifications when individuals enter/leave the webinar room or when other actions are taken by participants. This can be distracting.
- To turn off notifications (audible/visual)
  - Select "Edit" from the tool bar at the top of your screen
  - From the drop down menu select "Preferences"
  - Scroll down to "General"
    - select "Audible Notifications" Uncheck anything you don't want to receive and "apply"
    - Select "Visual Notifications" Uncheck anything you don't want to receive and "apply"
  - For Screen Reader User – Set preferences through the setting options within the Activity Window (Ctrl+slash opens the activity window)

9

---

---

---

---

---

---

---

---

## Technical Assistance

- If you experience any technical difficulties during the webinar:
  1. Send a private chat message to the host by double clicking "Great Lakes ADA" in the participant list. A tab titled "Great Lakes ADA" will appear in the chat panel. Type your comment in the text box and "enter" (Keyboard - F6, Arrow up or down to locate "Great Lakes ADA" and select to send a message ); or
  2. Email [webinars@accessibilityonline.org](mailto:webinars@accessibilityonline.org) ; or
  3. Call 877-232-1990 (V/TTY)

10

---

---

---

---

---

---

---

---

---

---

## Accessible Exterior Routes and Surfaces

11

---

---

---

---

---

---

---

---

---

---

## US Access Board

Bill Botten

12

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

PEDESTRIAN ROUTE	KEY ELEMENTS OF DESIGN INTENT
ACCESSIBLE ROUTES	Connects accessible elements and spaces of a building or facility on a site
SIDEWALK	Parallel to roadway Designed for pedestrians (not bicycles) Sometimes part of the roadway
TRAIL	Designed for the "recreation experience" Does not connect elements Generally includes a "trailhead" Has limited transportation function
SHARED-USE PATHS	Intended for multi-use Bicycle/Transportation focus Machine "laid" surface (improved) Often located in an "independent corridor" outside of the public right of way

UNITED STATES ACCESS BOARD

---

---

---

---

---

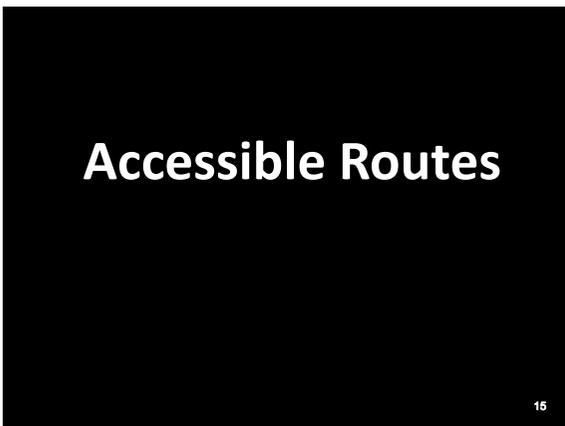

---

---

---

---

---

---

---

---

---

---

---

---

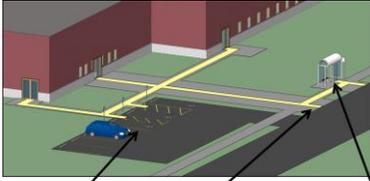

---

---

---

## Accessible Routes (206)

At least one accessible route to building entrances from site arrival points provided

- parking & passenger loading zones
- streets & sidewalks
- transportation stops

16

---

---

---

---

---

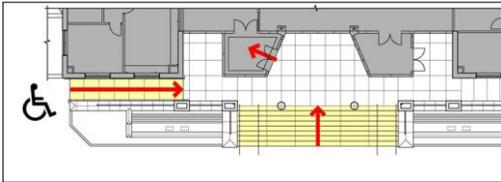

---

---

---

## Accessible Route Scoping

AR must coincide or be located in the same areas as general circulation paths

17

---

---

---

---

---

---

---

---

## Alterations (202.3)

Within an altered space, standards apply to those elements that are altered

(accessible route not required unless circulation paths altered or path of travel required)

18

---

---

---

---

---

---

---

---

## Alterations (202.3)

Standards apply based on:

- planned scope of work
- technical feasibility
- primary function areas/ path of travel

19

---

---

---

---

---

---

---

---

## Temporary Facilities (201.3)

20

---

---

---

---

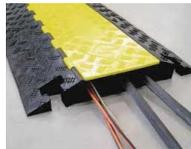

---

---

---

---

## Temporary Facilities

21

---

---

---

---

---

---

---

---

## Accessible Exterior Routes

22

---

---

---

---

---

---

---

---

## Accessible Routes and Large Spaces

Site Furnishings;  
Benches

23

---

---

---

---

---

---

---

---

## Common Use Circulation Paths in Work Areas (ADA Only)

206.2.8  
Exception 3:  
exterior areas  
fully exposed to  
weather

24

---

---

---

---

---

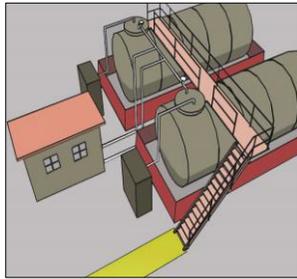

---

---

---

### Common Use Circulation Paths in Work Areas (ADA ONLY)

206.2.8  
Exception 2:  
circulation path  
is an integral  
part of  
equipment

25

---

---

---

---

---

---

---

---

### Ground & Floor Surfaces (302)

must be firm, stable, & "slip-resistant"

26

---

---

---

---

---

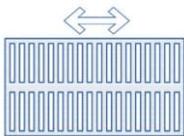

---

---

---

### Ground & Floor Surfaces

- Slip-resistance: specific value(coefficient of friction) not specified (Except - animal containment, sport activity)
- Carpet
- Openings (prevent passage of 1/2 diameter sphere; elongated = perpendicular to dominant travel direction)

27

---

---

---

---

---

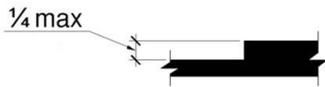

---

---

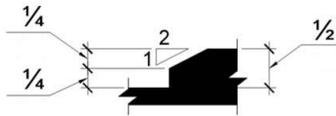

---

## Walking Surfaces

changes in level: 1/4" max (vertical)

1/2" max (beveled)

28

---

---

---

---

---

---

---

---

## Grates and Openings

- No more than 1/2 inch opening in the direction of travel.

29

---

---

---

---

---

---

---

---

## Ground & Floor Surfaces

Rough surfaces (e.g. cobblestones) make wheelchair travel difficult and uncomfortable.

Recommended: Avoid materials or construction methods that create bumpy and uneven surfaces

30

---

---

---

---

---

---

---

---

# Public Rights of Way

31

---

---

---

---

---

---

---

---

## Public Rights-of-Way

New guidelines will address:

- Sidewalks and street crossings
- "Pedestrian access routes"
- Shared-use paths
- Medians and traffic islands
- On-street parking
- Pedestrian signals
- Street furniture and other elements

Board is finalizing guidelines

32

---

---

---

---

---

---

---

---

## Routes

**Pedestrian Access Route.** A continuous and unobstructed path of travel provided for pedestrians with disabilities within or coinciding with a pedestrian circulation path.

**Pedestrian Circulation Path.** A prepared exterior or interior surface provided for pedestrian travel in the public right-of-way.

33

---

---

---

---

---

---

---

---

### Design Basics

- Surface - firm, stable and slip resistant;
- Clear width – 60” min. or 48” min. w passing spaces;
- Grade – 5% max. or road grade;
- Cross slope - 2% max.;
- Level change max. – ¼” vertical or ½” beveled;
- No large openings or gaps;
- Clear space - 30” x 48” min. at entrances, signal pushbuttons, and other pedestrian features (drinking fountains, parking meters, ATMs...)

34

---

---

---

---

---

---

---

---

### Running Slope (SNPRM)

R302.5.1 Within Street or Highway Right-of-Way - The grade shall not exceed the general grade of the adjacent street or highway.

R302.5.2 Not Within Street or Highway Right-of-Way - The grade of pedestrian access routes shall be 5 percent maximum.

R302.5.3 Street Crossings - The grade of pedestrian access routes shall be 5 percent maximum.

R302.5.4 Physical Constraints - Where compliance is not practicable due to existing terrain or infrastructure, right-of-way availability, a notable natural feature, or similar existing physical constraints, compliance is required to the extent practicable.

R302.5.5 Regulatory Constraints - Where compliance is precluded by federal, state, or local laws where the purpose is to preserve threatened or endangered species; the environment; or archaeological, cultural, historical, or significant natural features, compliance is required to the extent practicable.

35

---

---

---

---

---

---

---

---

### Running Slope (Grade)

- If the ADA Building Standards slope is applied to the right of way...

36

---

---

---

---

---

---

---

---

### Sidewalks (PAR)

Beveled edged pavers are an issue for roll ability.

Rollability of Exterior Paved Surfaces (FY 2014)

37

---

---

---

---

---

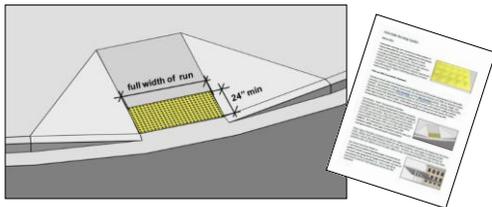

---

---

---

### Detectable Warnings

Proposed specifications for location at curb ramps

PROW guidelines will provide further guidance (e.g., placement at blended transitions)

DW Update on Board's website

38

---

---

---

---

---

---

---

---

### Detectable Warnings (705)

Required on curb ramps at:

- Transit facilities (DOT standards – 406.8)
- FHwy funded projects
- Public sidewalks (recommended – new ROW guidelines will address)

Not required on curb ramps at other facilities or hazardous vehicular areas

Required on rail station boarding platforms (810.5.2)

39

---

---

---

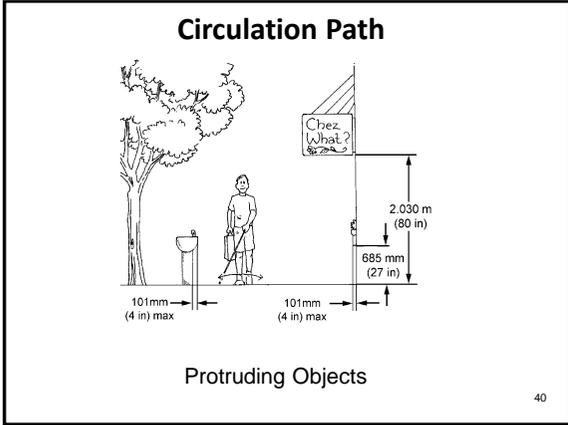

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

- ### Temporary Route Basics (Work Zones)
- Maintain pedestrian usability;
  - Same-side alternate routes if feasible (extra crossings increase risk);
  - Consider APS if extra crossings required;
  - Cane-detectable barricades;
  - PROWAG references MUTCD
  - Temporary facilities are also covered (street fairs, block parties, farmers' markets...)
- 42

---

---

---

---

---

---

---

---

## Security Barriers (206.8)

Security barriers (e.g., bollards) cannot obstruct ARs

43

---

---

---

---

---

---

---

---

44

---

---

---

---

---

---

---

---

## Shared Use Paths

- Advance Notice of Proposed Rulemaking (published March 28, 2011)
- Differentiates between trails designed for transportation and recreation purposes (bicycle use)
- Comment period ended (June 27, 2011)
- **Supplemental Notice - 2013**
  
- Rulemaking conducted under the ADA and the ABA

45

---

---

---

---

---

---

---

---

## Running Slope (SNPRM)

R302.5.1 Within Street or Highway Right-of-Way - The grade shall not exceed the general grade of the adjacent street or highway.

R302.5.2 Not Within Street or Highway Right-of-Way - The grade of pedestrian access routes shall be 5 percent maximum.

R302.5.3 Street Crossings - The grade of pedestrian access routes shall be 5 percent maximum.

R302.5.4 Physical Constraints - Where compliance is not practicable due to existing terrain or infrastructure, right-of-way availability, a notable natural feature, or similar existing physical constraints, compliance is required to the extent practicable.

R302.5.5 Regulatory Constraints - Where compliance is precluded by federal, state, or local laws where the purpose is to preserve threatened or endangered species; the environment; or archaeological, cultural, historical, or significant natural features, compliance is required to the extent practicable. 46

---

---

---

---

---

---

---

---

## Width

- **NO** minimum clear width requirement  
Full width must be accessible
- Width based on context, volume, and mix of users  
Not Accessibility

Bollards 47

---

---

---

---

---

---

---

---

## Next steps

- Complete regulatory assessment
- Final rule
- Adoption under the ADA and the ABA

48

---

---

---

---

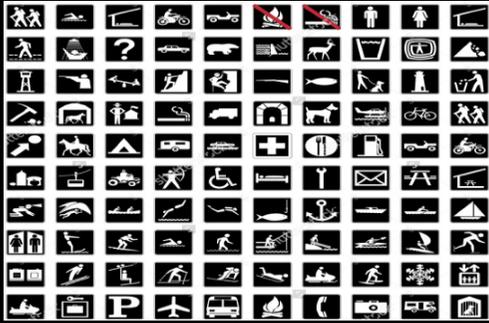

---

---

---

---

# Recreation Facilities

49

---

---

---

---

---

---

---

---

## Sports facilities

- Area of sport activity = That portion of a room or space where the play or practice of sport occurs
- Accessible route to each area of sport activity
- Exempt from firm, stable, and slip resistant surface provision

50

---

---

---

---

---

---

---

---

## Area of Sport Activity

51

---

---

---

---

---

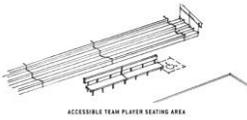

---

---

---

### Team player seating areas

- Platform lift permitted

52

---

---

---

---

---

---

---

---

### Area of sport activity

Court Sports –  
Accessible route to directly connect both sides of the court

53

---

---

---

---

---

---

---

---

### Observation Towers & Zip lines

203 General Exceptions  
203.3 Raised Areas.  
Areas raised primarily for purposes of security, life safety, or fire safety.

54

---

---

---

---

---

---

---

---

## Golf and Miniature Golf (238 & 1006) (239 & 1007)

Golf Car Passage

50% of the holes

55

---

---

---

---

---

---

---

---

## Fixed Boating Facilities

- 36 inch minimum
- 30 inch maximum rise
- Level landings
- Handrails/Edge Protection
- Change in level
- Openings

56

---

---

---

---

---

---

---

---

## Floating Facilities - Gangway Slope

- Gangway slope – connecting floating facilities

- Design for 1:12 maximum slope OR provide at least an 80 foot gangway

57

---

---

---

---

---

---

---

---

### Gangway – Small Facilities

Less than 25 boat slips, the slope of the gangway may exceed 1:12 (8:33%), if the gangway is at least 30 feet long

58

---

---

---

---

---

---

---

---

### Fixed Ramps on Floating Facilities

Follow accessible route requirements - maximum 1:12 slope, landings every 30 feet, edge protection, handrails, etc.

59

---

---

---

---

---

---

---

---

Accessible route to a recreational fishing pier?

60

---

---

---

---

---

---

---

---

## Play Areas

61

---

---

---

---

---

---

---

---

## Ground Level Accessible Routes

- Clear width
- Clear width reductions
- Changes in level
- Running Slope
- Cross Slope
- Openings
- Vertical Clearance
- Surface

62

---

---

---

---

---

---

---

---

## Referenced Standards

- **ASTM F 1487-01** - Standard Consumer Safety Performance Specification for Playground Equipment for Public Use.
- **ASTM F 1292- 99 or 04** - Standard Specification for Impact Attenuation of Surfacing Materials Within the Use Zone of Playground Equipment.
- **ASTM F 1951-99** - Standard Specification for Determination of Accessibility of Surface Systems Under and Around Playground Equipment
- Use of "Equivalent facilitation" for more recently published versions of these standards

63

---

---

---

---

---

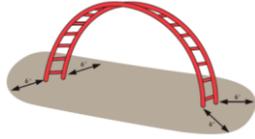

---

---

---

### ASTM F 1487-01

- Defines the use zone as the ground area beneath and immediately adjacent to a play structure or play equipment .
- Provides for unrestricted circulation around the equipment and on whose surfaces where it is predicted that a user would land when falling from or exiting play structures or equipment

64

---

---

---

---

---

---

---

---

### Accessible Surfaces located in the Use Zone - 1008.2.6.2

- If located within the use zone, the accessible ground surfaces must also be impact attenuating (ASTM F 1292-99 or 04);
- No value shall exceed:
  - 200 g-max
  - 1000 HIC

65

---

---

---

---

---

---

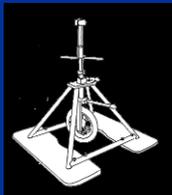

---

---

### Accessible Surface Material

- ASTM 1951-99
- Determination of Accessibility of Surface Systems Under and Around Playground Equipment

66

---

---

---

---

---

---

---

---

### ASTM F 1951-99

- Wheelchair Work Test Method
- A lab test in a controlled environment
- 7% ramp used as baseline
- Measures work per sq. ft. for straight propulsion and turning.
- Records data applied to push rim over 6 ½ ft. distance

67

---

---

---

---

---

---

---

---

### Surface Inspection and Maintenance

Accessible ground surfaces must be inspected and maintained regularly & frequently to ensure continued compliance with ASTM F 1951-99.

68

---

---

---

---

---

---

---

---

Longitudinal Assessment

### NCA Playground Surface Study

69

---

---

---

---

---

---

---

---

### Sample Values for Various Surface Types\*

Surface Type	Firmness	Stability
Concrete	.15 - .17	.17 - .19
Turfgrass	.55 - .65	.69 - .79
Carpet <small>( 1/8 inch cut pile w/ 1/8 inch pad)</small>	.32 - .43	.41 - .55
Sand	1.13	< 1.13

\*The values are from sample surfaces.

73

---

---

---

---

---

---

---

---

74

---

---

---

---

---

---

---

---

75

---

---

---

---

---

---

---

---

## Outdoor Developed Areas (ABA)

- Trails
- Picnic/Camping
- Beach Access Routes
- Viewing areas

Effective November 2013

76

---

---

---

---

---

---

---

---

## Trails

- Pedestrian route developed primarily for outdoor recreational purposes
- Newly constructed/alterd trail directly connected to a trailhead or another trail that substantially complies with guidelines
- Conditional exceptions permitted – new and altered
- Shared use paths to be addressed in separate rulemaking

UNITED STATES ACCESS BOARD

77

---

---

---

---

---

---

---

---

## Trail Slope/Grade

Running Slope of Trail Segment		Maximum Length of Segment
Steeper than	But not Steeper than	
1:20	1:12	200 feet (61 m)
1:12	1:10	30 feet (9 m)
1:10	1:8	10 feet (3050 mm)

UNITED STATES ACCESS BOARD

78

---

---

---

---

---

---

---

---

## Surface Technical Requirements

- **Trails:** The surface of trails and their related passing spaces and resting intervals shall be firm and stable (1017.2).

**Advisory 1017.2 Surface.** A firm trail surface resists deformation by indentations. A stable trail surface is not permanently affected by expected weather conditions and can sustain normal wear and tear from the expected uses between planned maintenance.

NPRM for outdoor developed areas

ACCEPTABLE FOR THE SURFACE TO BE BOTH MODERATELY FIRM AND MODERATELY STABLE FOR TRAILS LESS THAN 1 MILE IN LENGTH, AND WHERE THE TRAIL IS MODERATELY LEVEL (< 3% SLOPE)

Table A. Calculation and Classification	
Firmness Classification	Amount of Penetration
Very Firm	0.3 inches or less
Modestly Firm	Greater than 0.2 inches and less than 0.5 inches
Not Firm	Greater than 0.5 inches
Stability Classification	Amount of Penetration
Stable	0.5 inches or less
Very Stable	Greater than 0.5 inches and less than 1.0 inch
Not Stable	Greater than 1.0 inch

79

---

---

---

---

---

---

---

---

---

---

---

---

## Trails

- 36 inches minimum width
- Passing spaces – every 1,000 feet where less than 60 inches in width
- Tread obstacles – 2 inches maximum, **except concrete, asphalt, or board** = ½ inch
- Openings – ½ inch maximum

UNITED STATES ACCESS BOARD

80

---

---

---

---

---

---

---

---

---

---

---

---

Soil Stabilizers

## NCA Trails Surface Study

81

---

---

---

---

---

---

---

---

---

---

---

---

Soil Stabilizers

### NCA Trails Surface Study

- 11 surface materials (8 organic and 3 aggregate)
  - ¼ inch minus crushed limestone and dust
  - ¾ inch minus crushed limestone and dust
  - ¾ inch minus crushed limestone and dust base and ¼ inch minus crushed limestone and dust top dress
  - Klingstone 400
  - Stabilizer
  - StaLok
  - Soiltac Liquid Mix-in
  - Soiltac Liquid Topical
  - Soiltac Powder Mix-in
  - Soiltac Powder Topical
  - Polypavement

82

---

---

---

---

---

---

---

---

### Outdoor recreation access route (ORAR)

- Modified accessible route
- Connects outdoor constructed features **within picnic facilities/units, camping facilities/units, designated trailheads or viewing areas - ONLY**

83

---

---

---

---

---

---

---

---

### Outdoor recreation access routes

- Surface – firm and stable
- Clear width – 36 inches minimum
- Passing space – required where width is less than 60 inches - 200 ft. max
- Obstacles – 1 inch maximum, **except concrete, asphalt, or boards = ½ inch**
- Openings – ½ inch

UNITED STATES ACCESS BOARD

84

---

---

---

---

---

---

---

---

## Outdoor recreation access routes

Running Slope of Segment of Outdoor Recreation Access Route		Maximum Length of Segment
Steeper than	But not Steeper than	
1:20	1:12	50 feet (15 m)
1:12	1:10	30 feet (9 m)

UNITED STATES ACCESS BOARD

85

---

---

---

---

---

---

---

---

---

---

## Additional Access Board Sponsored Surface Research

Improving Engineered Wood Fiber Surfaces for Accessible Playgrounds

Stabilized Engineered Wood Fiber for Accessible Trails

---

---

---

---

---

## Trail and camping unit project

NATIONAL JAMBOREE 2019

87

---

---

---

---

---

---

---

---

---

---

### Parking

88

---

---

---

---

---

---

---

---

### Beach access routes

Where required –

The construction or alteration of any of the following facilities to serve the beach:

1. Circulation paths;
2. Parking facilities;
3. Toilet facilities; or
4. Bathing facilities

Exception limits the cost of the beach access route to no more than 20 percent of the cost of constructing or altering the facilities

UNITED STATES ACCESS BOARD

89

---

---

---

---

---

---

---

---

### Beach access routes

- Permanent or removable
- Minimum number – at least one for each ½ mile of shoreline managed by the entity
  - Not required to exceed the number of pedestrian access points to a beach provided by the entity

UNITED STATES ACCESS BOARD

90

---

---

---

---

---

---

---

---

### Beach access routes

- Connections -
  - High tide level
  - Mean high water
  - Normal recreation pool
- Clear width - 60 inches min.
- Obstacles - 1 inch max, except concrete, asphalt, or boards = 1/2 inch

---

---

---

---

---

---

---

---

### Surface Technical Requirements

• **Beach Access Routes:** The surface of beach access routes and resting intervals shall be firm and stable (1018.3).

---

---

---

---

---

---

---

---

## Continuing Education

AIA Provider Number: I017  
ICCR: 17432

Course Title: Accessible Exterior Routes and Surfaces  
Course Number: GL20181101  
Date: November 1, 2018

Credits earned on completion of this course will be reported to AIA CES for AIA members. Certificates of Completion are available upon request.

This course is registered with AIA, for continuing professional education. As such, it does not include content that may be deemed or construed to be an approval or endorsement by the professional organizations of any material of construction or any method or manner of handling, using, distributing, or dealing in any material or product.
